Payments Reimagined

Taking on the cloud and the next evolution in payments

Ali Minaei

CTO & Co-Founder, Gr4vy

Ali Minaei

CTO & Co-founder at Gr4vy

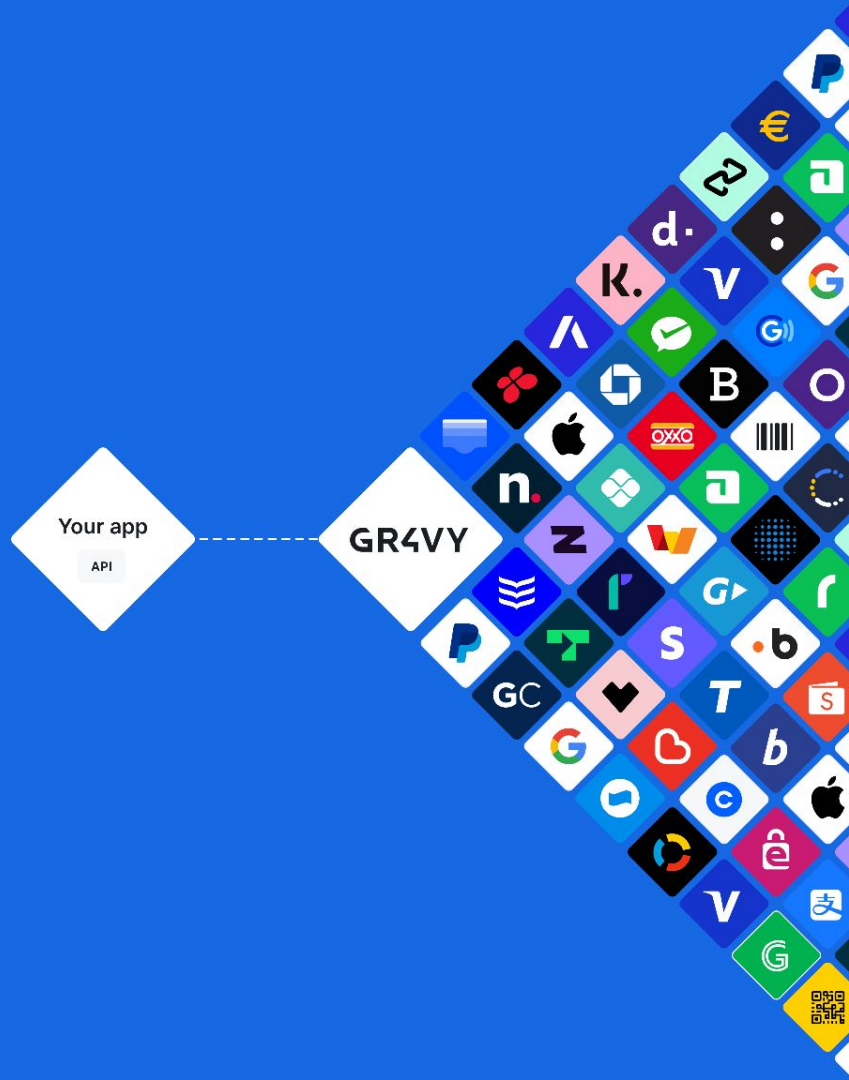

With over 20 years of experience in building and leading software engineering teams Ali held senior engineering positions at various fintech companies, including PayPal, Yoyo Wallet, and Wonga.

During his time at PayPal, Ali filed for more than 16 patents in the payments industry, showcasing his expertise and passion for technology and innovation.

In addition to his contributions to the payments industry, Ali is an advocate for diversity and inclusion in the tech industry and has been involved in mentoring and advising early-stage startups. He is committed to making a positive impact through his work and is widely respected in the technology community for his expertise and leadership.

About Gr4vy

Gr4vy is a powerful payments platform that allows you to deploy, manage, customize and optimize all your payments through one simple, universal integration. With a unique single-tenant, cloud-based infrastructure, Gr4vy makes scaling your business faster than ever.

What is cloud computing?

The **delivery of on-demand computing services**, from applications to storage and processing power, typically over the internet and on a pay-as-you-go basis.

What is an edge?

Computing that takes place at or near the physical location of either the user or the source of the data. **By placing computing services closer to these locations, users benefit from faster, more reliable service.**

**What does cloud mean
for payments?**

Edge and data
residency

CLOUD PAYMENTS MATRIX +

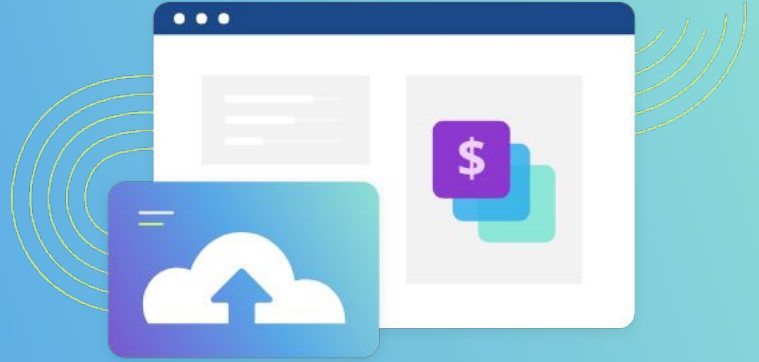

THE PROMISE OF <no_code/>

The promise of no-code platforms is that they'll make software development just as easy as using Word or PowerPoint so that the average business user can **move projects forward without the extra cost (in money and time) of an engineering team.**

FUTURE PROOF YOUR INFRASTRUCTURE
